CLEANING MACHINES RANGE AVAILABLE TO HIRE OR BUY

# MMG PLUS ADVANCED SCRUBBING MACHINE

Utilising the latest technology, the MMG is packed with great features to assist the user in performing their task faster and safer than ever before.

Hire

Buy

Scan to watch

- Best for cleaning large floor areas
- It's versatile, able to work in any environment and in any conditions
- Reversing cameras, front and rear lights
- Automatic actuator to drop and lift the squeegee and brushes
- Adjustable brush pressure, water output and suction strength
- Ergonomic forms optimized for maximized operator comfort

## Achieve ultimate cleaning in the shortest time

The MMG is an advanced scrubbing machine which makes cleaning large floor areas fast, efficient and simple.

The automatic actuator to drop and lift the squeegee and brushes enables the user to simply drive off and start cleaning. With reversing camera, front and rear lights, onboard video tutorials and much more, it's guaranteed to improve the performance of your team.

With the added benefit of Zone setting, you can also adjust brush pressure up to a massive 100kg, water output, suction strength and drive speed depending on the Zone you're operating in. So 'Shop floor' could have slower speeds and quieter suction than 'Goods bay'. The options are endless to achieve the ultimate clean in the shortest time anywhere on your site.

Sturdy high density polyethylene body protects against damage from impact

Directional nozzles can spray cleaning solution up to 3 metres

# GXL POWERFUL LIKE THE BIG MACHINES, AGILE LIKE OUR SMALL ONES

Bringing powerful performance to smaller areas where larger machines are difficult to manage.

Scan to watch

Hire

Buy

- Best used in smaller areas where larger machines are difficult to manage
- Charge up to 80% battery in just 1 hour
- Equipped with an orbital cleaning pad system for incredibly clean results
- Keep track of your machine with the Fleet Management system
- Eco-mode for quieter cleaning and minimal disturbance
- Dries floors, leaving them safe for use soon after cleaning

## Suitable for any small and demanding environments

With the added benefit of the latest technology in lithium-ion batteries, the GXL can be charged at any point during its battery cycle and will charge up to 80% in just one hour. With the onboard charger, it can be deployed almost anywhere, making it a convenient workhorse for any application.

The special parabolic squeegee follows the movements of the machine, swinging out to collect the maximum amount of water from the floor, even when turning tight corners. Ensuring your floors are as dry as possible, making them safe for use soon after cleaning.

With virtually none of the splash-out caused by a conventional brush system, the GXL leaves a perfect result and has twice the cleaning power of conventional systems.

Squeegee is parabolic, moving along with the machine when making turns

High brush pressure to easily tackle even the most stubborn dirt

# GENIE XS THE SMALLEST MACHINE IN OUR RANGE

Leaves floors dry and safe to walk on. Enjoy safer cleaning with the Genie XS!

Scan to watch

Hire

Buy

- Scrubs and dries in a single pass
- Perfect for washroom or kitchen areas
- Capable of cleaning where most machines can't
- Batteries can be recharged at any point during its battery cycle
- Charge up to 80% battery in just 1 hour
- Forward and backwards cleaning
- Small and lightweight, you can take it wherever you need it
- Can be stored anywhere, even in the smallest closet

## Cleaning on demand, whenever and wherever

Its very compact design means it can easily clean around and under chairs, tables, bars and basins. The Genie XS will clean faster and more effectively than a mop and bucket, whilst taking up about the same amount of space in the cleaner's cupboard!

With one simple movement, the squeegee moves to the front of the machine, meaning that the operator can then walk backwards and clean just as effectively as moving forwards. This is perfect for cleaning in very restricted spaces such as toilet cubicles and underneath tables.

When in storage mode, the handle is raised, and the machine stands on its end, giving it a smaller footprint than most mop buckets. So, with the reduction in cleaning consumables and achieving better results in less time, the Genie XS is a no-brainer for anyone currently using traditional mops in small areas.

Dries floors in just a few seconds, preventing the risk of dangerous slips

Quickly recharges for multiple uses throughout the day

# MY16 THE NEW INNOVATIVE CLEANING SOLUTION

Concentrating the performance of a scrubbing machine in just a few centimetres, increasing hygiene level on small surfaces and reducing work times.

Hire

Buy

- Perform accurate 360° cleaning
- 10% higher productivity compared to traditional scrubbing machines
- User-friendly soft touch control panel
- Centre of mass directly above brushes, providing excellent brush pressure
- Easy to move around multiple obstacles
- Simple to fill, use and empty
- High capacity 22L tank

## Providing better hygiene with just one pass

With a range of simple features, the MY16 is a well-designed machine, capable of cleaning corridors, classrooms, wards and warehouses with ease. Its unique upright design gives it a very small footprint but gives no compromise on capacity. With a 22L tank, the MY16 can cope with large areas as well as being easy to move around multiple obstacles.

Simple controls and a gel battery make this machine a very popular traditional style unit with a modern twist. Its simple-to-use design is immediately apparent, and the recovery tank is especially accessible, ensuring it can be cleaned out easily after every shift to prevent the build-up of dirt and bad odours in the machine.

Flawless cleaning around bends and corners with just a single pass

Clean close to corners without any difficulty in manoeuvring
